NOTES:

1. Peugeot Space Measurement System uses sensors at the ends of the front bumper to measure the size of a parking space. The system will then indicate the degree of parking difficulty.
2. Motorised tailgate on SW allows opening/closing of the tailgate from key, drivers seat or from control on tailgate
3. Peugeot Open and Go system replaces a mechanical key with a vehicle identifier. Electronic recognition of the identifier gives hands free access to 508 and starting and stopping is simply activated by pressing the Start/Stop button.
4. Peugeot Connect SOS and Assistance pinpoints the location of the vehicle in the event of accident or breakdown and enables the dispatch of emergency or assistant services.
5. Independent Programmable Heating System permits a faster increase in temperature of the passenger compartment decreasing the time needed to reach desired comfort level.
6. Peugeot Smartbeam Assistance monitors driving conditions and surroundings of 508 and automatically switches headlamps to full beam when conditions allow.
