PLUG AND PLAY

An electric car that's more everyday than out-of-the-way. One that's accessible to everyone. And most importantly, one that doesn't cost the earth. Say hello to the new all-electric Corsa-e. It's 100% electric, 100% exciting, and designed to fit in with your life perfectly.

209 MILES

on a full-charge*

0-60 MPH

in 7.6 seconds

Up to 209-mile range

The new all-electric Corsa-e takes you everywhere you want to go with an all-electric powertrain and impressive 209-mile range. With EV-specific connected services you can precondition the car, set delayed charging cycles, search for charging stations for a set navigation route, all from your smartphone.

Additionally, the Corsa-e features an intuitive on-board app that gives the driver an accurate overview of the current state of charge, the range and driving stats.

Dynamic driving experience

The Corsa-e delivers effortless acceleration when you need it, gliding from 0-60mph in just 7.6 seconds.

What's more, you get a choice of driving modes, depending on your mood and the driving conditions. Sport mode increases the thrill, while Eco mode optimises your range.

*Provisional data. The electric range shown was achieved using the new WLTP test procedure. Figures are intended for comparability purposes only. The electric range you achieve under real life driving conditions will depend upon a number of factors, including the accessories fitted after registration, variations in driving styles, weather conditions and vehicle load.

Charging options

With various charging options you can charge your Corsa-e anywhere, whether at a specifically designed wallbox, a public charging station or at home. When you're out and about a rapid charger can re-charge the battery from 15% to 80% in 30 minutes, whilst a home wallbox (7kW) will give you a full charge in 7.5 hours.

Low running costs

The Corsa-e offers truly exceptional running costs. Not only that but your servicing costs are lower too. Fully electric cars are currently also exempt from vehicle excise duty, and there's no congestion charge to pay, either. That's some serious savings.

NO CONGESTION CHARGES

15-80% CHARGE

in 30 minutes*

£0 VED

0% BiK**

VX_COR_e_30366

*You can obtain 15-80% of the vehicle charge in 30 minutes from a 100kW rapid charging station. Rapid charging stations are widely available across the UK at various locations and their power rating varies, typically from 50kW and sometimes up to 350kW. The charging time may vary according to the type and power of the charging station, the outside temperature at the charging point and the battery temperature. **Zero % BiK applies to vehicles registered from April 2020. Corsa-e registrations prior to this date will be 16% BiK.
